

ABSTRACT

A grill unit and a cooking apparatus having the grill unit, the grill unit including a plurality of grill pipes; water tanks connected to ends of the grill pipes to supply water into the grill pipes; covers to selectively open and close upper portions of the water tanks; and guide members respectively extending from inner surfaces of the covers toward insides of the water tanks to guide condensed water formed on the inner surfaces of the covers into the water tanks. The grill unit prevents water condensed on inner surfaces of the covers of the water tanks of the grill unit from flowing out of the water tanks.
